- 1989 - 2004: VICE-PRESIDENT/CHIEF FINANCIAL OFFICER;
RJG Construction Company, Inc.,
Advanced Support Technology, Inc., (Distr. For
Construction Products)
Kenneth B. Drake, Robert J. Greenberg & Associates
(Construction Consultants)

RJG Construction Company, Inc. is celebrating fifty-three years in business over which time we have specialized in the repair of structures damaged by land subsidence, earthquake, explosion and mudslide. We can work directly with your engineering consultants or we can provide our clients with independent consultants to fit the size, scope and nature of the project.

In 1991, RJG expanded its foundation repair program by acquiring the Southern California Distributorship for the **A.B. Chance Helical Anchor System**. This system is a cost-effective alternative method in some cases, used for permanent foundation repair, structural re-leveling, slope stabilization as well as emergency shoring applications.

In 1996, the **Helical Earth** anchoring division became a separate entity under the corporate name, **Advanced Support Technology, Inc.** **AST** currently maintains a network of more than twenty certified helical anchor installation contractors serving California and Nevada.

AST expanded its helical pier product line in 2004 to better serve a varying market place. We currently market helical pier products from **Maclean-Dixie, Pier Tech, Earth Contact Products (ECP), Patriot Foundations and Ideal Foundations.**

Construction consulting and cost estimating services offered under the firm of **Kenneth B. Drake, Construction Consultants.**
